

**Performance criteria of the System at the scale of**

- Individual Modules
- Global Connections/Nest

**Performance criteria of the System in terms of**

- Energy system
- Material system

**Performance criteria of the System in terms of**

- Programmatic
- Architectonic

**Parameterizing Individual units****Logic to be derived from the program of each module**

BioGeometry, Radiesthesia, Tarot, Acupuncture, Reiki, numerology, Parapsychology, Pyravastu, Music Therapy, Color Therapy, Witchcraft

**Architectonic Descriptions of a Space**

- Light
- Translucency to water/air
- Geometry
- Volume
- Haptic experience
- Sensory experience, resonance to sounds, colours
- 'Electromagnetic' experience

**Architectonic Descriptions of a Structure**

- Formal Logic – **Diatom Cell Wall**
- Material Logic – **Diatom cell wall composition - Silica**
- Behaviour – Energy and material system

**Parameterizing Local Connections and Global power lines****Logic to be derived from the overlaps among various modules**

BioGeometry, Radiesthesia, Tarot, Acupuncture, Reiki, numerology, Parapsychology, Pyravastu, Music Therapy, Color Therapy, Witchcraft - all talk about 'energy' in every system, electromagnetic, gravitational, as also convertible to/expressed as sound, colour, shape

An 'form' thus that aligns itself to such 'subtle' energies

(This may also be for a limitation of scope)

**Could be taken a little further in terms of what entropy principles guide the formation of colonies under water of diatoms.**
